At SAVOYE, we understand that your daily activities involve challenges and that managing internal logistics may be complex.

Imagine working with a single partner who is present each step of the way, from the design phase to execution of your project, and who delivers a portfolio of global solutions designed to meet all your challenges.

LOOK NO FURTHER!

Our objective is clear: from a single, unique range, deliver a turnkey solution of leading-edge systems capable of **handling all your logistics issues.**

From the purchase order to delivery, from cloud services to packaging, our experts design and integrate solutions to suit the requirements of your Supply Chain and your logistics operations. We work hand in hand with you to fully understand your needs and the scope for the development of your activity.

Our wide range of solutions extends from **order picking to automated storage, including supply chain execution software,** to enable you to stand out in every process.

We invest continuously in our talented people, as well as the technologies and partnerships needed to expand our range of services, **to remain at the forefront of innovation.**

Our commitment drives us to constantly anticipate your future needs and offer unrivaled expertise throughout the lifespan of your installation.

With SAVOYE, you have more than just a supplier... You have a trusted partner who ensures successful logistics operations!

A SINGLE TRUSTED PARTNER

SAVOYE will help you achieve more profitable, efficient and sustainable logistics with solutions that manage, optimize and orchestrate your logistics processes. We design your future warehouse by wisely combining our in-house solutions with the rigorous selection of third-party systems.

THE OUTCOME?

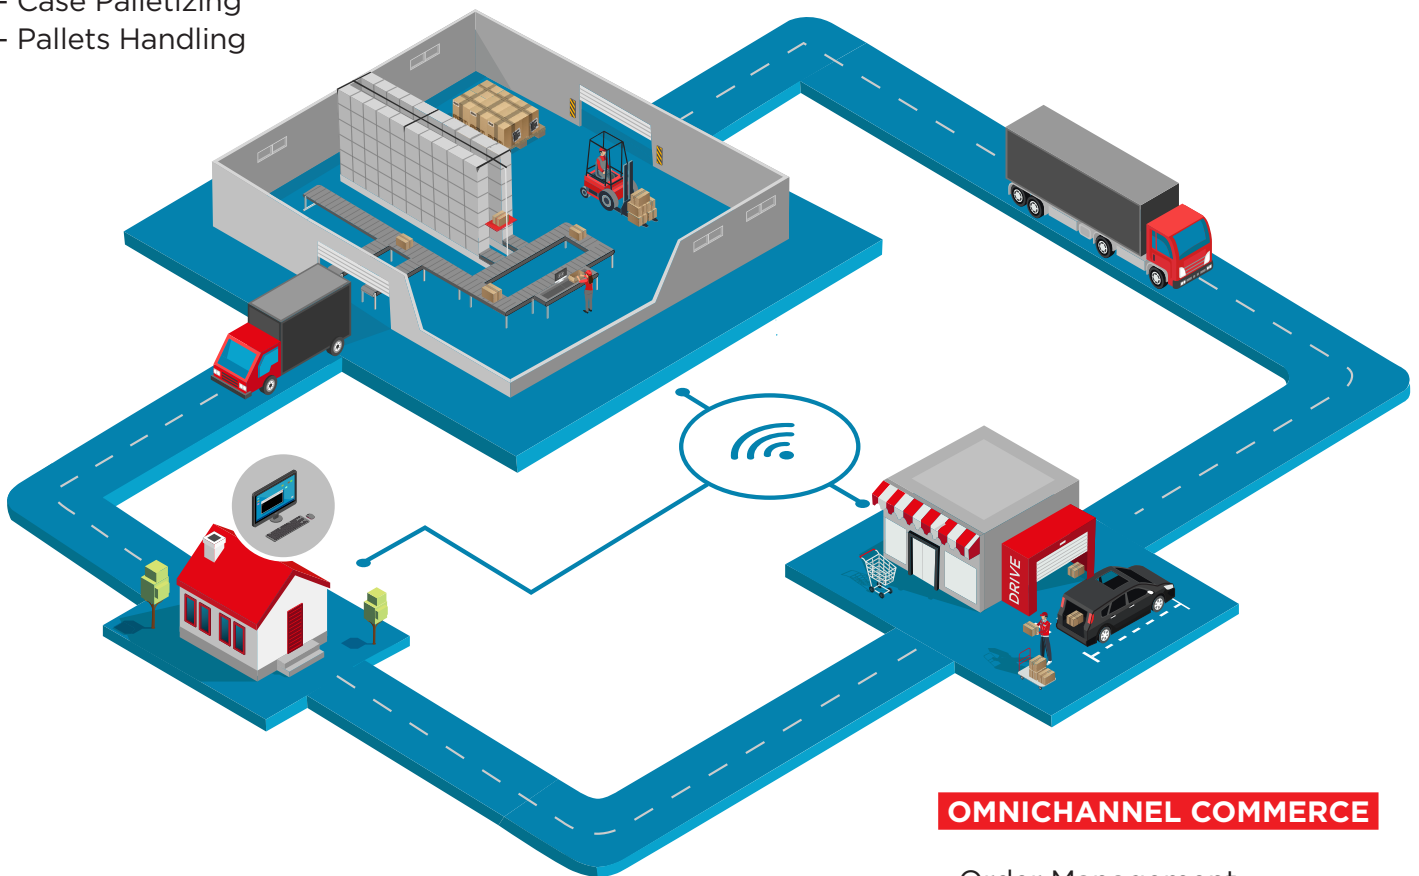

A global, tailor-made logistics solution that perfectly matches your specific issues.

AUTOMATION & ROBOTICS

- Warehouse Execution
- Item Picking
- Automated packing
- Case Palletizing
- Pallets Handling

SUPPLY CHAIN EXECUTION

- Warehouse Management
- Transportation Management
- Labor Management

OMNICHANNEL COMMERCE

- Order Management
- Store Management
- Micro-Fulfillment Centers

YOUR DAILY CHALLENGES

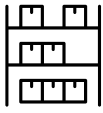

With SAVOYE, resolve all your logistics issues.

▶ **Satisfy your end customers.**

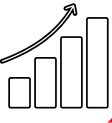

Secure all your logistics processes and enhance the customer experience.

▶ **Optimize storage volumes.**

Use the whole height of your warehouse and extend its lifespan.

▶ **Improve overall performance.**

Upgrade your logistics and improve your profitability.

▶ **Shorten delivery lead times.**

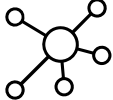

Optimize responsive picking and handling urgent orders.

▶ **Handle contingencies.**

Anticipate changes in your activity and adapt your processes to developments in your business model.

▶ **Manage activity data and forecasts.**

Analyze your data to anticipate demand and your workload.

▶ **Benefit from a durable information system.**

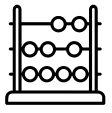

Monitor and manage all your logistics flows using adaptive and scalable software.

▶ **Become a benchmark player in the supply chain.**

Access new technologies and innovate, by focusing on activities that generate high added value.

▶ **Control your operating costs.**

Reduce your spending on packaging and transportation, manage a lack of workforce more easily.

OUR LATEST-GENERATION SOFTWARE

With SAVOYE, get the most out of your installations with our high-performance software suite.

WAREHOUSE EXECUTION SYSTEM

With KWEST, synchronize and control your automated and robotic equipment in real-time. Meet all your reactivity and performance objectives thanks to improved strategic prioritization of your orders, and dynamic multi-criteria inventory reallocation. Open up new possibilities by integrating SAVOYE solutions or third-party systems, and benefit from global supervision of your installation.

WAREHOUSE MANAGEMENT SYSTEM
TRANSPORT MANAGEMENT SYSTEM
ORDER MANAGEMENT SYSTEM

ODATIO is a unified platform that combines WMS, TMS and OMS in the same application. The solution is modular and ultra-configurable, enabling you to optimize your logistics processes, orchestrate your orders, manage a multi-warehouse network, all while managing all your transportation activities.

WAREHOUSE MANAGEMENT SYSTEM

The WMS perfectly suited to SMEs and basic, relatively non-automated environments.

ORDER MANAGEMENT SYSTEM

Omnichannel platform supporting the retailer experience. SoCloz brings together an OMS and POS in a single interface.

With **SAVOYE**, configure the best solution
with our proprietary or integrated system.

AUTOMATED STORAGE SOLUTIONS

- ◆ **X-PTS** shuttle system
- ◆ **HAIPICK** mobile robots by SAVOYE
- ◆ Single, double or multi-level pallet solutions
- ◆ 2D pallet shuttle system
- ◆ Miniloads
- ◆ Stacker cranes
- ◆ Sorters

AUTOMATED PICKING SOLUTIONS

- ◆ **X-PTS** Pick Station
- ◆ **FLEEXEE** mobile robots
- ◆ Station systems
- ◆ Pick-to-light and put-to-light strips
- ◆ High-speed sorters
- ◆ Palletizer and depalletizer robots

AUTOMATED PACKING SOLUTIONS

- ◆ **PAC 600** packing machines
- ◆ **JIVARO** box height adapter machines
- ◆ Insertion of documents

- ◆ owners solutions
- ◆ integrated solutions

BY YOUR SIDE FOR A LONG TIME

With SAVOYE, choose a partner who can support you throughout the life of your warehouse, and who is already anticipating the challenges of tomorrow!

We support you in designing and developing your project until it is ready for launch. Once this is achieved, we stay at your side throughout the life cycle of your solution and its successive upgrades.

1

AUDIT & EXPERTISE

Benefit from 35 years of experience in internal logistics with two services:

- ◆ Advisory service: comprehensive logistics audit, identification of areas for improvement, process implementation
- ◆ Preliminary: performance audit, warehouse design, flow analysis, picking zone mapping, packaging format review, and more

2

SOLUTION DESIGN

We help you design tailor-made solutions comprising standard components. Logistics process design, selection of best software and technologies. Plans, simulation, software demonstrations, simulation tests (digital twin).

3

PROJECT REALISATION

Project management, development, installation, tests, commissioning. Experienced and dedicated teams (scheduling management, project governance, functional analysis, risk analysis, change management, commissioning support).

4

SUPPORT & MAINTENANCE

- ◆ Remote support
- ◆ On-site support: corrective and preventive maintenance, regular servicing, restoration
- ◆ Full service: a dedicated SAVOYE team at your logistics hub
- ◆ OMS: fully online application to manage your maintenance activity (human resource and equipment management). Control your preventive and curative maintenance ratios while producing budget analyses and prioritize your day-to-day operations
- ◆ Spare parts
- ◆ Cloud services
- ◆ Infra & IT monitoring : databases, backup and replication solutions

5

TRAINING

- ◆ Documentation
- ◆ Tailored programs
- ◆ Shop-floor training
- ◆ e-learning platform

AND AFTERWARDS?

Upgrades: Because your activity changes, our teams remain at your side to assist with developments and re-designing your organization with modern, appropriate solutions.

Innovation: Our best source of inspiration? Our customers! We always listen to your feedback and work with you to develop innovative solutions, while ensuring that you benefit from them first!

WHY SAVOYE ?

- ◆ **A single point of contact:** no more juggling between several companies for your different needs, opt for simplicity and only deal with one partner, who can deliver all the turnkey solutions you need.
- ◆ **Transparency of processes:** our level of support and comprehensive supervision tools provide enhanced visibility of your operations and a more proactive approach to handling urgent situations.
- ◆ **Consolidated expertise:** extends from sector expertise in logistics processes (retail picking) to project engineering. Our expertise across the whole internal logistics process means we can understand your specific needs and deliver solutions with a higher degree of customization and suitability.
- ◆ **Enhanced coordination:** we ensure transparent coordination between project phases (preliminary, during and afterwards). This guarantees fluid communication and coherent integration of solutions, no more risks of errors and inconsistencies.
- ◆ **Savings:** no more costs incurred by managing multiple suppliers, coordinating different stakeholders and specific interfaces.
- ◆ **Global project management:** the capacity to manage your whole project from design to implementation makes scheduling and execution much easier. This optimizes delivery lead times, reduces delays and improves customer satisfaction.
- ◆ **A global performance guarantee:** because we deliver an end-to-end solution, we also guarantee the global performance of your installation, while remaining at your side to maximize its potential and usage.
